**aquafresh**

**bench-top water purifiers**  
affordable & convenient

Sparkling clean, freshly filtered drinking water can be on tap in your kitchen at a fraction of the cost of bottled water.

The first thing you'll appreciate with one of our stylish Bench-top Water Purifiers is great tasting water. But there many other benefits – the first and most important is the removal or reduction of nearly all of the things that make water smell and taste bad.

A bench-top water purifier will reduce or remove dirt, rust, scale and most other impurities.

It will also do the same with chlorine and other chemicals, herbicides, pesticides and, best of all... with the appropriate cartridge, take out protozoan cysts including the super nasties, Giardia and Cryptosporidium and other potentially harmful contaminants.

Don't waste money on bottled water from the supermarket; make your own filtered water at home for a fraction of the cost.

## PORTABLE

No plumbing required. Sits on your kitchen bench-top and connects to your tap in moments. Ideal for the home, office, holiday unit, caravan...in fact anywhere there's a thirst for top quality water is a perfect spot for a Bench-top Water Purifier.

## AUSTRALIAN MADE

Will fit most kitchen faucets. Has chrome diverter valve and chrome spout for long, rust-free life. Cartridge change monitor tells you when your filter needs replacing.

## CARTRIDGES

A range of premium grade cartridges are available from 5 micron down to 0.5 micron.
