The CT Series Cartridge Filter Housings are three-piece, all-metal housings with ring-nut closures. These housings are designed to meet general industrial filtration needs. The CT Models offer a choice in construction materials and are available with a forged brass head and 304 stainless steel sump or in all-stainless steel in one-high (CT101), two high (CT102), or three-high (CT103) designs. The heads on all CT Models have tapped mounting pads. Mounting brackets are supplied with housings. CT models also include a tommy bar tool for opening/closing ring nut (not supplied with CT 'A' Models).
